First of all, let us introduce our game. Cyber Hunter is a competitive next-generation mobile game. It is full of many different elements including survival, shooting, exploration, skills and much more, even in this parkour! In short, it's a whole new gaming experience. The game tells the story of our future, after the technology of brain-computer interfacing became very advanced, and human civilization experienced another evolutionary leap, during which great events began to happen. Justice is facing evil. The old one stands against the new one. And the forces of conservatism clash with radicalism. In this virtual world, all our heroes and heroines have been super powerful with the help of quantum droids – the ability to transform quantum cube energy into every tactical support device they need. From optical camouflage to quantum barriers, from a detector that warns of impending enemies, to a medical instrument that heals teammates; everything and everything can be built by you, and that's not all. You can choose what skills you think will help your strategy the most in each battle. We even created the concept of vertical combat. With parkour features including climbing, gliding and rolling, players can experience vertical battles in a variety of terrains, including mountains, swamps and deserts. In this game, the arena that organizes battles are not only a huge, flat map, but a world where you can fly in the sky and move underground. We have also created many search points scattered around the world. Here you can explore temples in the desert with the chance to find e-cores to unlock new skills and weapons. Among the mounds of destroyed robots, you can also find gloves that significantly increase the speed of climbing. We hope that Cyber Hunter will bring you a new way to enjoy the games and that you will love participating in the sandbox competitions it offers. The game still has room for improvement, but if there is overheating, slowing down, occasional restarts or device updates during the game, apologize in advance and ask for understanding. We can assure you that this version does not reflect the final quality of the but only the beginning of something even more fun. Your valuable suggestions and feedback will be the driving force behind cyber hunter's continuous improvement, and your enthusiasm and passion will motivate our ongoing efforts. Finally, we would like to express our gratitude for downloading and supporting our game. Thank you! Test period: EDT(New York) 09:00 a.m. - 03:00 (+1 day) a.m.May 18th - May 24thDear Wanderers,Please to make your acquaintance, allow me to introduce our game, Project: Battle:Battle (Alpha Test) is a sandbox competitive mobile game. It combines in many elements such as survival action, fierce shootings, dynamic building, tactical tactical and exploration. This will provide a whole new gaming experience. The game takes place in the not so distant future, where due to the technological development of mind cells humanity has opened another dimension - quantum virtual world. In this new world, a series of events broke out between justice and evil, conservatism and radicalism. Which path will you choose? In a quantum virtual world, you can become the leader of the Celestial Wanderers, which represents justice and order. Or become Zero, which is the No.1 cyber hunter. Then jump into live, well-developed interspersed stories that are filled with fresh and distinctive characters. Our heroes of this new world have an absolute superpower, the ability to manipulate quantum cube energy in different structures. Create a 12-meter watchtower to provide protection and tactical advantage, set traps to freeze enemies, forging radars to detect enemy whereabouts, and more. Everything is under your control. Quantum Cube energy can be easily obtained in the quantum virtual world by smashing various objects located on the battlefield, such as refrigerators, street lamps, fences, etc. I hope that Project : Battle will bring you a whole new experience. However, as it is currently in the alpha testing phase, the game is far from perfect. If you run into any problems while exploring this virtual world, such as unexpected bugs or crashes during gameplay, or if you have any suggestions to improve your gaming experience, let me know. You can contact the team by getting feedback in-game. I greatly appreciate your understanding and support. Your enthusiasm and love of the game will be a source of constant effort by the team. Finally, I would like to express once again my sincerest thanks for participating in this test and supporting the game. Thank you!
